

WHAT IS CLAIMED IS:

1. An image sensing apparatus comprising:

an image sensing device for sensing the image of a
subject and outputting image data representing the image
5 of the subject;

a display control unit for controlling a display
unit in such a manner that the image of the subject
represented by the image data output from said image
sensing device will be displayed on a display screen;

10 a designating unit for designating an electronic
zoom area in the image of the subject displayed on the
display screen;

a light-emission control unit for controlling a
strobe light-emission device in such a manner that a
15 part of the subject that corresponds to an image within
the electronic zoom area is illuminated with strobe
light; and

a recording control unit for recording, on a
recording medium, image data output from said image
20 sensing device and data indicating position of the
electronic zoom area or image data representing the
image within the electronic zoom area.

2. An image sensing method comprising the steps of:

sensing the image of a subject and outputting image
25 data representing the image of the subject;

displaying the image of the subject represented by
the obtained image data on a display screen of a display
unit;

00766577 012301
FOE2FO 259260

illuminating, with strobe light, a part of the subject that corresponds to an image within an electronic zoom area designated in the image of the subject displayed on the display screen; and

- 5 recording, on a recording medium, image data obtained by image sensing and data indicating position of the electronic zoom area or image data representing the image within the electronic zoom area.
